revuto

R TOKEN MINING PROGRAM

5 Booster types • additive speed • up to 6× mining

BOOSTERS

1× → 8×

BASE MAX

Mine faster by using R Mining Boosters inside the Revuto mobile app.

One base speed. Five ways to boost it.

Every eligible miner starts at the same 1.00× speed. Ecosystem participation adds Booster Power.

1×	+500%	6×
BASE SPEED	TOTAL BOOSTER POWER	SYSTEM MAX
1 R/hour	additive	6 R/hour

Mining Multiplier = min(1.00 + total active Booster contributions, 6.00)

No category multiplies another. Everything simply adds up.

Illustrative campaign configuration • Booster contributions are additive • System maximum: 6.00×

The 5 Booster families

Maximum Booster Power is deliberately spread across different valuable behaviors.

1 — REVU Commitment Booster

The strongest Booster. Lock predefined USD-equivalent amounts of REVU and stack the tiers.

MAX +200%

$25 REVU lock		+10%
$50 REVU lock	$50 or $100 is optional for a partnering project	+20%
$100 REVU lock		+40%
$250 REVU lock		+80%

FULL REVU = 3.00× BASE

$425 FULL COMMITMENT

+150% tiers + 50% completion bonus = +200%

Activation: lock the REVU amount calculated from the selected USD tier at the approved reference price.

2 — Revuto PRO Booster

Keep an eligible PRO subscription active. The longer you stay active, the stronger the boost.

MAX +100%

1 active month	+25%
2 consecutive months	+50%
3 consecutive months	+75%
4+ consecutive months	+100%

PRO MAX = +1.00×

Monthly and yearly PRO subscriptions follow the same active-month progression.

3 — Referral Booster

Bring real, activated friends into the ecosystem. Quality referrals unlock progressively higher speed.

MAX +75%

2 qualified friends	+7.5%
5 qualified friends	+22.5%
10 qualified friends	+45%
20 qualified friends	+75%

REFERRAL MAX = +0.75×

Qualified = registered + activated + started R Mining. Fake, duplicate, self-referral and bot accounts do not qualify.

4 — Product Usage Booster

Use Revuto products every week. Card spending and token swaps split the Booster 50 / 50.

MAX +75%

CARD SPENDING • 7 DAYS

$25 +3.75% • $50 +11.25% • $100 +22.5% • $250+ +37.5%

TOKEN SWAPS • 7 DAYS

$50 +3.75% • $100 +11.25% • $250 +22.5% • $500+ +37.5%

CARD + SWAP = +0.75×

Weekly activity determines the Product Usage boost for the relevant Booster period.

5 — Loyalty Booster

Keep returning to Revuto and maintain the required engagement streak.

MAX +50%

1 successful period	+12.5%
2 consecutive periods	+25%
3 consecutive periods	+37.5%
4+ consecutive periods	+50%

LOYALTY MAX = +0.50×

Engagement frequency may tighten as the campaign matures; missing the required period may reset the streak.

Stack everything. Reach 6×.

The fastest miners participate across the whole Revuto ecosystem — not just one action.

1.00×	+	+2.00×	+	+1.00×	+	+0.75×	+	+0.75×	+	+0.50×
BASE		REVU		PRO		REFERRAL		PRODUCT		LOYALTY

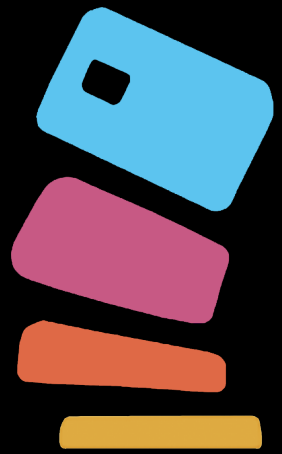

= 6.00 ×

MAXIMUM MINING SPEED

At a working base rate of 1 R/hour → up to 6 R/hour → up to 144 R per fully active 24-hour session.

BNPL Overboost to unlock ultimate mining speed

Revuto could introduce an ultimate BNPL Booster that rewards users who stake **USDC on Solana** to support BNPL loans.

= 8.00 ×

MAXIMUM MINING SPEED

Up to 8 R/hour → up to 192 R per fully active 24-hour session.

The amoun of USDC to stake in BNPL18 Staking Pool and ulock the BNPL Overboost will be determined during the R Tooken Mining Program.

R Mining - Mobile App Preview

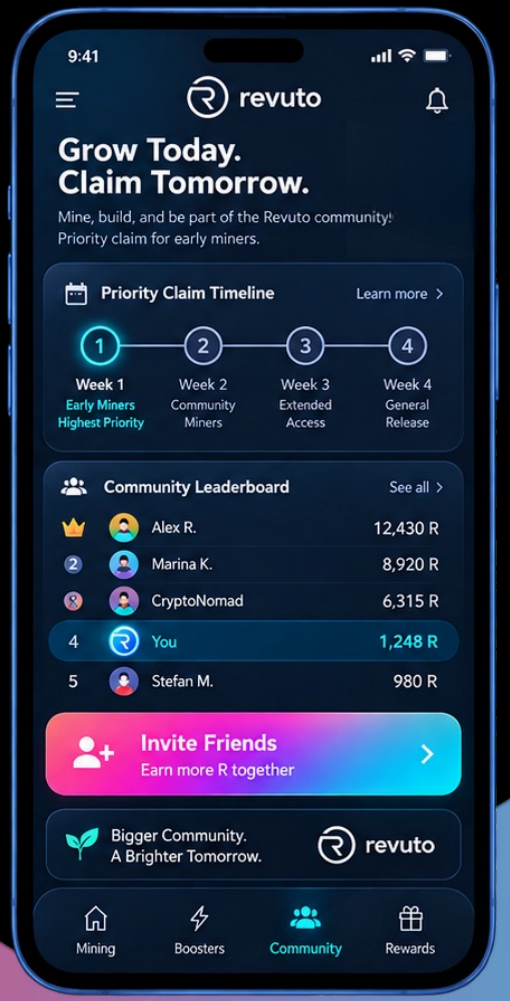

1. R MINING HOME

2. BOOSTERS / COMMITMENT

3. CLAIM / COMMUNITY / GROWTH

Revuto Mobile App Preview is not a final version of how the R Token Mining Program will look like.
